Profile

Motivated Computer Science undergraduate with a basic foundation in programming and algorithms. Passionate about developing efficient software systems and intelligent applications, with strong problem-solving skills and adaptability to new tools. Eager to contribute to innovative projects and grow as a software developer in collaborative environments.

Education

2022 – 2026
guntur, India

Bachelor of technology - computer science
R V institute of tecnology

skills

- java
- python
- c++

Technologies

- HTML
- CSS
- NODE JS

Certificates

Short -Term Internship on Python Full Stack development

Enhanced user experience by developing responsive web designs ,Developed, coded, modified and debugged application programs of varying degree of complexity with full independence,
Worked with senior developers and designers to implement Software using HTML, CSS, JavaScript.

artificial intelligence and machine learning

Gained valuable experience working within a specific industry, applying learned concepts directly into relevant work situations.

Projects

2025

hematovision

blood cells

HematoVision is a deep learning-based web application built using Flask that enables automatic classification of white blood cell images into four categories: Neutrophil, Monocyte, Lymphocyte, and Eosinophil. By leveraging Convolutional Neural Networks (CNNs), this tool helps reduce diagnostic time and increases the accuracy of cell type detection for pathologists and lab technician
